# CEO CRIOKEEP PROJECT

The effectiveness and cost of using advanced therapeutic products is currently limited by the need to use different consumables to comply with the protocols (storage, transport and dosage for the patient). CRIOKEEP proposes a solution that includes in a single consumable devices the functions of cryogenic storage, transport and dosing of a therapeutic product to the patient, while reducing the number of processes. The risks of contamination, sample loss and loss of traceability with the counter-sample are thus eliminated...
